Turbocharge Your Team/ Zoom Rooms Experience with Bluescape

Transform the way you work together

Everyone on the **same page**

The Pandemic changed the way teams work around the world. What used to be a simple in-person meeting has now turned into a virtual collaborative experience. This shift to distributed working hasn't been easy though. The biggest hurdles being collaboration, file sharing and teamwork.

Companies have struggled to adapt to a system that helps their teams across the geographies collaborate

and work in a productive way. The inefficiency further multiplies in shared digital spaces.

The best way out is to provide an easy, functional and a quick-to-adapt solution.

Bluescape helps teams collaborate in real-time. The meeting experience is greatly transformed with this collaborative solution.

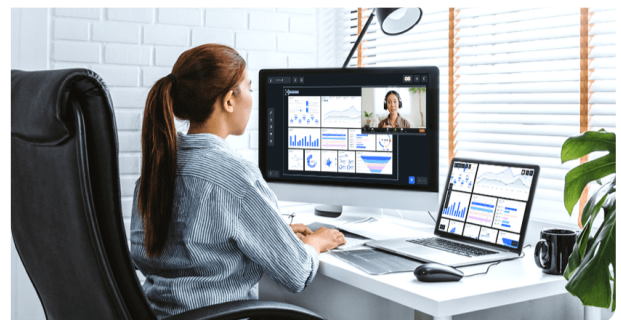

Before

- Share files, content and information
- Prepare for meetings and finalise presentations

During

- Share multiple screen, annotate and collaborate seamlessly
- Save the work progress of all the team discussions and data

After

- Get started where you left off in previous meeting
- Save time of recaps for easy and quick decision making

The Human element

The Future of work won't be just about digital capabilities, increased importance will be given to human communication, connectivity and collaboration on a global scale. Human interaction and the ability to work as if you were in the same room would be the key to a productive workforce.

Bluescape provides a visual and spatial digital workspace to collaborate within the organisation. Team members can work together while sharing their screens for a rich meeting experience.

Without Bluescape

- Single person sharing screen at a time
- No option to save workflows
- Real-time updated and single file annotation is not possible

With Bluescape

Brainstorm ideas and save workflows

Design, annotate and work on content together

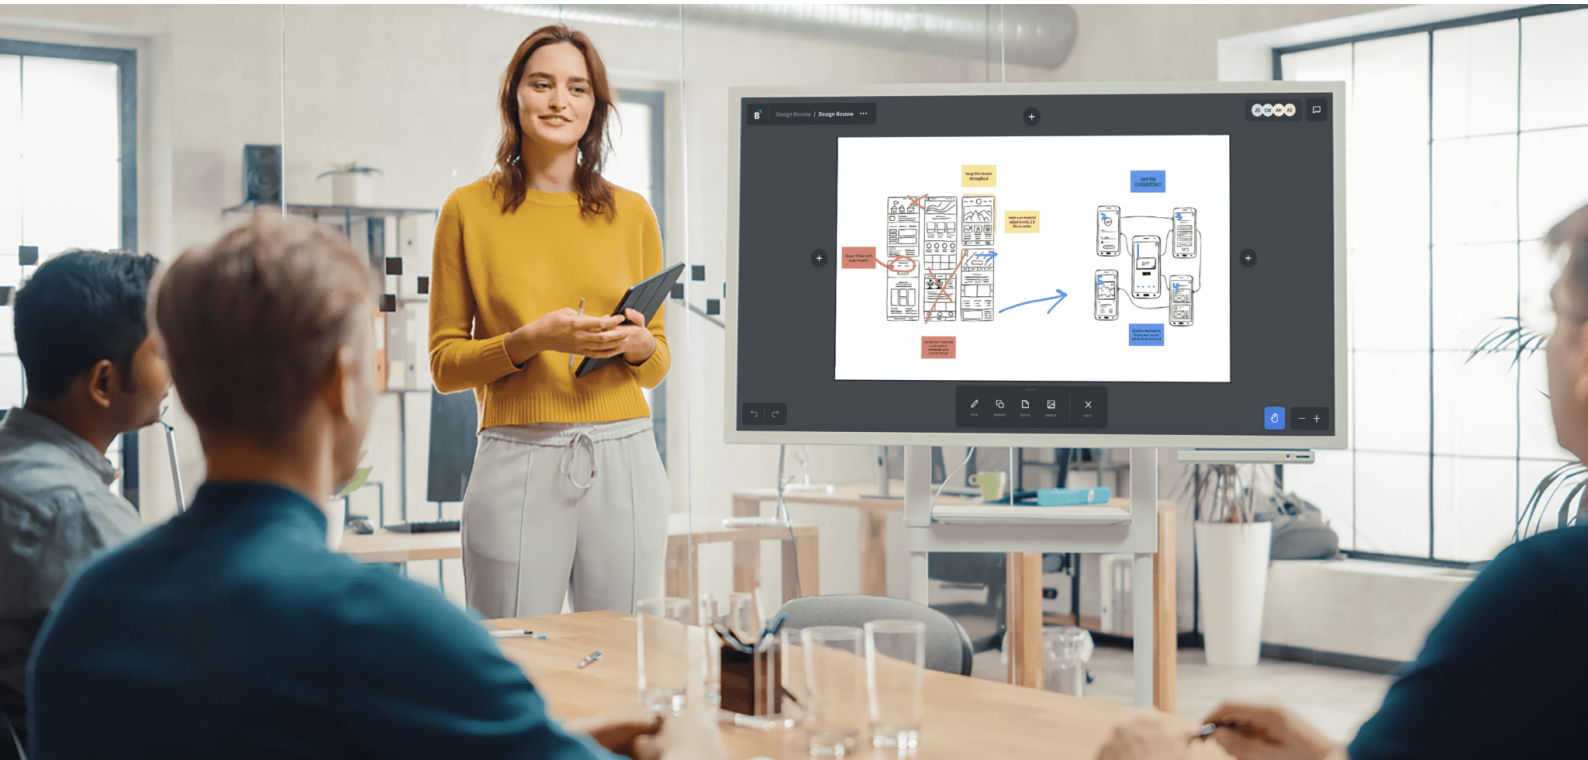

Multiple team members can share screen simultaneously

The work culture is changing and work from anywhere(WFA) has gained impetus. Bluescape with its multi-device enablement and secure environment truly empowers the working professionals to reap the benefits of working from any location without impacting productivity.

Bluescape helps you stay connected with people, information and content, whenever and wherever you need.

Maximise Bluescape Capabilities with the right setup

BLUESCAPE[®]

Bluescape enables better visual collaboration, effective decision-making and improves team engagement. However, to truly experience the benefits of Bluescape, we at AllWave AV suggest enabling a complete AV setup in the form of a **“Decision Room.”**

Office setup can be designed with interactive Display and all-in-one Video bars like Quantum Leap. This setup makes the decision room tables clutter-free, aesthetically pleasing and functional. For the WFA setup, the remote workforce can use either laptops or an interactive screen

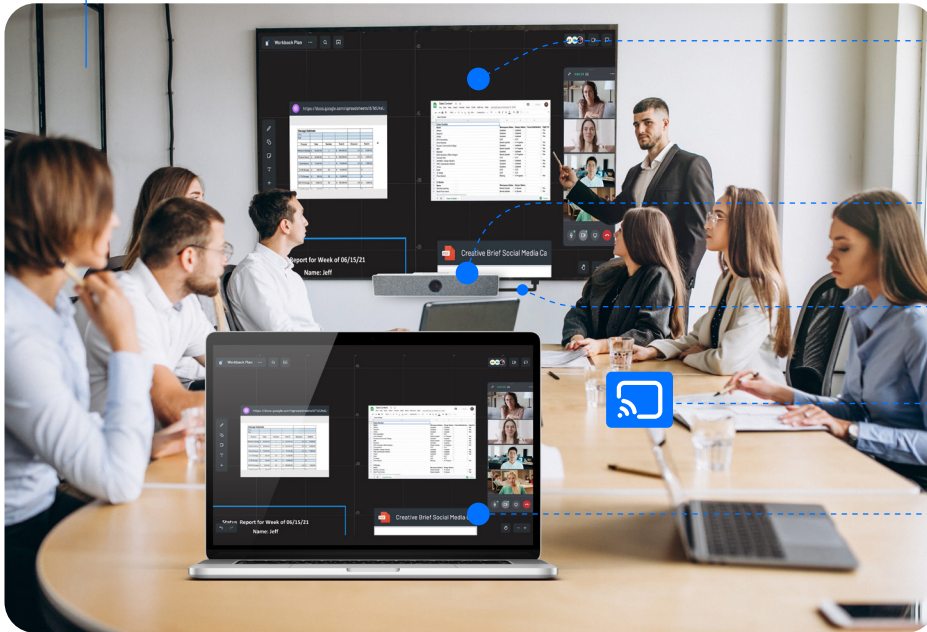

Bluescape A Truly Hybrid Complete Solution

- Bluescape can be deployed to any kubernetes container-based cloud platform such as Amazon web services, Microsoft Azure and Google cloud platform
- It integrates with productivity suites, cloud storage platforms, conferencing solutions, design applications and even product tracking software like Adobe illustrator , Adobe Photoshop, Amazon Chime SDK, Box , etc
- Bluescape Supports SSO and custom permissions, roles and user-level authorization

With an advanced setup you can enable your teams to work, collaborate and communicate much more efficiently.

Transform your office into a truly hybrid workplace. With the right setup your team can reap the benefits of Bluescape platform to the fullest.

Meeting Room Set-up

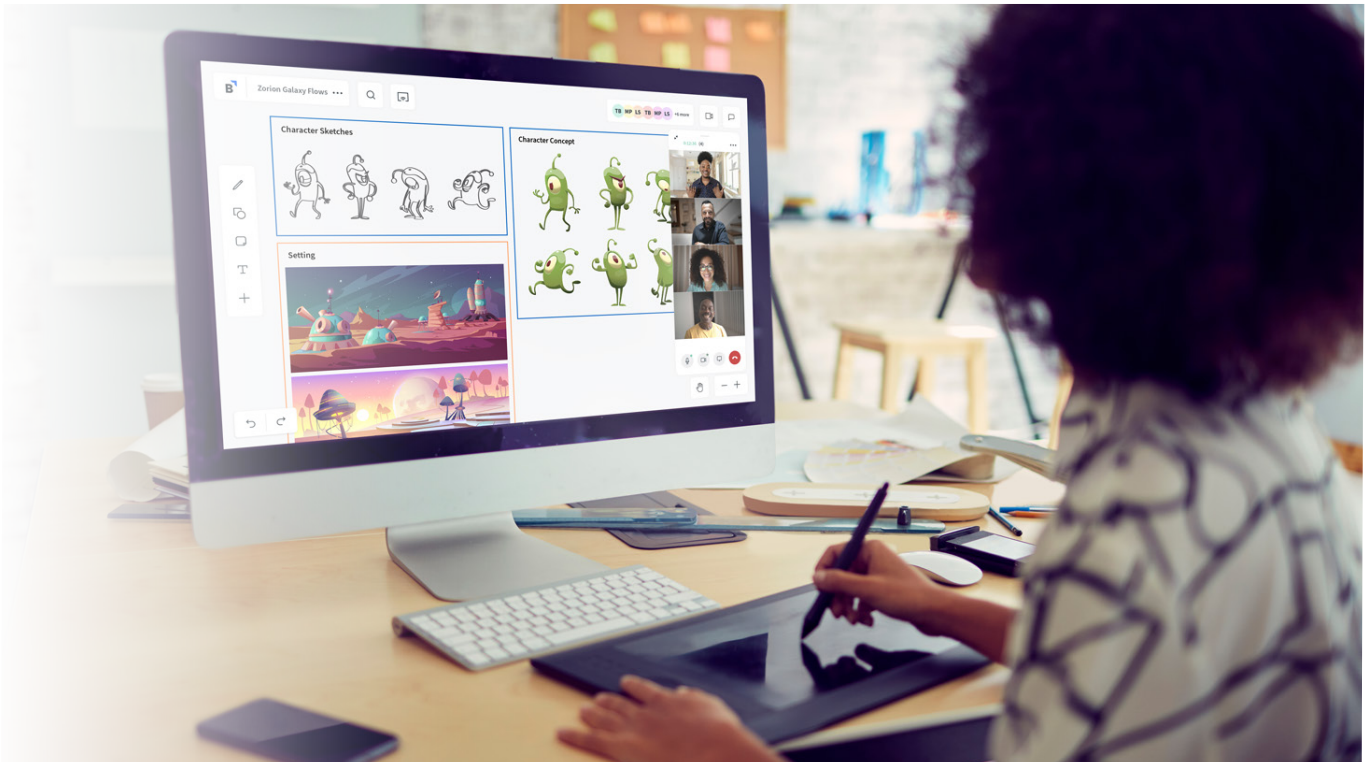

- Interactive display
- Video bar
- HDMI i/n
- Casting from Laptop to Big IFP
- Laptop

Remote Location Set-up

- Screen one
- USB Cable
- Interactive Screen two

Experience **Visual Collaboration** at its best with Bluescape.
